

Medary Town Board Onsite Meetings  
Tuesday August 23, 2011, 5:30 pm  
Onsite Meeting Minutes

Meeting was called to order @ 5:30 pm

Attendance: Linda Seidel, Chairperson, Bob Keil, Supervisor I, Mike Weibel, Supervisor II and Rollie Peters, Town of Medary Roads

I. All members road to W5357 Hidden Springs Rd to review the drainage; it was determined that RW Peters will grate the shoulder to encourage water to drain and disperse through the culvert

and not along the roadway. Additionally, RW Peters will fill and compact a hole near the drainage culvert along the shoulder due to erosion that has exposed electrical lines.

II. Members then proceeded to Meadow Wood to inspect the Smith drainage culvert - this work had not yet begun, Linda Seidel will call Tom Brown.

Members then reviewed the Kabat driveway and discussed grating and lowering the shoulder of the road to improve water dispersment and drainage. RW Peters will complete the grating

down of the shoulder along the Kabat property in Meadow Wood.

III. Members then traveled to review Harter Dr. and the damage increasing along the road due to large amounts of rain fall throughout the summer. The town board will make road improvement

recommendations for Harter Dr. during the 2012 Road Tour; this will be a "priority" road repair.

IV. Members completed the "site meeting" at N2586 Shady Maple Ln, town resident had concerns regarding the amount of "gravel" left within cu d sac following the 2010 seal coating. The Town

Board identified the amount of "extra gravel" did not warrant any sweeping or clean up, it was consistent with the balance of gravel following all town roads with seal coating.

Meeting adjourned @ 8:00 pm

Respectfully Submitted, Linda Seidel
